Assignment Instructions:

As you have learned, human memory is malleable and fallible. As a result, research on human memory has significant implications for clinical practice as well as for situations involving ethical, legal, and forensic considerations. For this discussion, you will read the article listed below that explores the impact of misinformation on witnesses in a lineup situation. Read the article below, briefly summarize the findings detailed in the article, and respond to the following questions:

- What factors can impact the accuracy of eyewitness testimony?
- How might findings from the article reviewed be applicable to other legal or forensic situations?
- How might the findings from the article be important to consider for a therapist in clinical practice or for an educator in a school setting?

Greenspan, R.L, & Loftus, E.F. (2020). Eyewitness confidence malleability: Misinformation as post-identification feedback. *Law and Human Behavior*, 44(3), 194-208. DOI: http://dx.doi.org/10.1037/lhb0000369
