

## **Assignment Instructions**

Your write up for this assignment is based off the videos included in this module regarding different attributes of Piaget's cognitive developmental theory as well as course readings.

Watch the four short video clips that provide examples of Piaget's conservation tasks for each of the four stages of cognitive development. Here are the four short video clips I am talking about:

1. <https://www.youtube.com/watch?v=ue8y-JVhjS0>
2. <https://www.youtube.com/watch?v=GLj0IZFLKvg>
3. <https://www.youtube.com/watch?v=gA04ew6Oi9M>
4. <https://www.youtube.com/watch?v=zjJdcXA1KH8>

After watching each video, please describe **why** the child responded to the task the way s/he did by using **Piaget's** explanations (not your own or explanations from other theories!). Use Piaget's terms and provide definitions or explanations of those terms, make sure to reference as appropriate for the assignment.
