Cottle, A. (2009). Integrating 21st Century Skills in Schools Using a Class Blogging Project. *West Virginia Online Action Research Journal*.

This article is an example of action research, which Suter defines on page 153 of your text.

Consider the “Five-step sequential process model of action research” (figure 6.4, p. 154) as you read the Cottle article and determine whether or not the process outlined in figure 6.4 was followed by Cottle. If so, identify or explain each step by specific reference to the Cottle article. If not, identify which steps were missed and/or overlooked, and explain why these omissions might weaken the paper.
